

# Gurwinder Kaur

## QA Engineer

### ABOUT ME

I have over 4 years of experience as a QA Engineer, focusing on ensuring the quality and reliability of web and mobile applications. I work closely with developers, product managers, and other team members to identify issues early and help deliver smooth, user-friendly experiences.

I'm always looking for opportunities to learn and improve my skills. I've worked on projects across various domains, including healthcare, e-commerce, CRM, logistics, and enterprise solutions.

### EXPERIENCE

#### GiniLytics IT Solutions, Mohali — QA Engineer

Oct 2021 - Present

Joined as a Junior QA Engineer, promoted to QA Engineer based on performance and contribution.

Responsible for analyzing requirements, identifying gaps, and ensuring the overall quality of web and mobile applications.

Verified and managed change requests, ensuring timely and accurate implementation of updates and fixes.

Designed and executed test cases for functional, regression, and integration testing.

Collaborated closely with developers and product teams to report and resolve issues during various phases of the SDLC.

Actively participated in review meetings and provided feedback to improve product quality and team processes.

Worked on projects across different domains, including CRM, B2B, and service-based applications.

### EDUCATION

#### Punjabi University Patiala — B.Tech in CSE

**Punjabi University Patiala** is an institute of higher education located in Patiala, Punjab, India.

### PROJECTS

#### RayTax

**Domain:** Real Estate – Tax Reduction Platform

RayTax is a real estate platform designed to help property owners reduce their property taxes. The system allows agents to manage client cases, file legal claims, and handle documentation to achieve tax reductions on behalf of their clients.

#### My Roles and Responsibilities:

- Performed both manual and automation testing to ensure the platform's reliability, performance, and security.
- Validated end-to-end workflows for agents and clients, ensuring accurate calculations and smooth navigation.
- Created and maintained comprehensive test cases covering functional, regression, and integration scenarios.
- Reported, tracked, and followed up on defects using JIRA, working closely with developers to ensure timely resolutions.
- Conducted cross-browser and mobile compatibility testing to ensure a consistent experience across devices.
- Participated actively in Agile ceremonies, including sprint planning, stand-ups, and retrospectives.
- Coordinated directly with the client to clarify requirements, provide updates, and gather feedback.

#### MenuTrinfo

**Domain:** Healthcare – Nutrition and Allergen Management

MenuTrinfo is a healthcare platform that provides users with accurate allergen and

### TECHNICAL SKILLS

- Manual Testing
- Functional & Regression Testing
- API Testing (Postman, Swagger)
- JIRA & Bug Tracking Tools
- Test Case Design & Execution
- Cross-browser Testing
- SQL (Database Validation)
- Agile & Scrum Methodologies
- Basic Automation Testing (Selenium)

### SOFTWARES

- Postman
- JIRA
- Swagger

### AWARDS & CERTIFICATES

- Employee of month at GiniLytics IT Solutions.
- Complete SQL Crash Course.

### LANGUAGES

- English
- Hindi

### HOBBIES

- Basketball, Volleyball
- Reading – Exploring new technologies and methodologies in QA and software testing.

### STRENGTH

- Good Listener
- Ready to Learn new things
- Dedicated to delivering high-quality test cases and coverage
- Quick learner, staying updated with the latest testing tools and techniques

nutritional information to support safe and informed dietary decisions. The platform supports agents in managing client cases and ensures compliance through training and certification programs.

**My Roles and Responsibilities:**

- Develop the features laid out in the Sprint.
- Tested the platform to ensure the accuracy and integrity of allergen and nutritional data.
- Validated user journeys for both agents and clients, focusing on usability and data correctness.
- Designed and executed test cases across functional, regression, and integration testing.
- Logged and tracked issues using JIRA and collaborated closely with developers to troubleshoot and resolve bugs.
- Coordinated with the client for requirement discussions, clarifications, and testing feedback.

**MedSupply**

**Domain:** Healthcare – Medical Equipment Rental

MedSupply is a platform connecting hospitals and patients with rental medical equipment, covering browsing, booking, delivery scheduling, and return workflows.

**My Roles and Responsibilities:**

- Tested end-to-end rental workflows for hospitals and patients, from booking through return.
- Designed and executed functional and regression test cases across the booking and scheduling flows.
- Validated order, availability, and pricing logic to ensure accurate equipment allocation.
- Logged and tracked defects in JIRA with detailed repro steps, working closely with developers through resolution.
- Actively participated in sprint planning, stand-ups, and retrospectives for the project.
- Performed cross-browser and mobile testing to ensure a consistent experience for patients and hospital staff.

**CMT (China Mountain Trading)**

**Domain:** ERP

China Mountain Trading Company provides a full-service supply chain experience, including product development, engineering, packaging design, quality control, timeline management, and customs clearance. The platform supports end-to-end supply chain operations and is built using the .NET Framework and MVC architecture.

**My Roles and Responsibilities:**

- Tested supply chain workflows to ensure smooth integration across modules such as product development, packaging, and logistics.
- Created and executed detailed test cases for functional, integration, and regression testing.
- Validated API responses and data consistency between frontend and backend systems.
- Reported and tracked bugs using JIRA, coordinating with the development team to ensure timely fixes.
- Performed database validation and wrote basic queries to verify data accuracy.
- Participated in review meetings and client discussions to clarify requirements and deliver accurate QA feedback.

**Thank you,**
